THE "BUNGALOW" CURTAIN FIXTURE

Cut $\frac{1}{2}$ size, except length.

We present an entirely new device for hanging Lace Curtains and other light window drapery. It consists of two ornamental Brackets mortised on the edge, and into which is inserted a slat $1\frac{1}{2}$ inches wide by $\frac{1}{4}$ inch thick and 4 feet long.

The Slat is rounded on the edge and well finished, making it easy to slip through the most delicate Lace Curtain without damaging it.

The chief advantage of this device is in the fact that the Slat can be taken out and the Curtain slipped off without the necessity of removing the usual knobs, ends or other fastenings.

The Slat, being flexible, is easily sprung into position. It is easy to put up, and it can be curved inward and outward, or used straight, as the occasion may require. Its ornamental feature will commend it, and of its practicability there can be no doubt with any one who has investigated it.
